## Specialized Memory Support for Older Adults at The Highlands Assisted Living

Our Memory Support at The Highlands at The Moorings is at the forefront of today's fresh new thinking. We care for people who have difficulty thinking by providing them with new opportunities for an enhanced and enriched quality of life.

The Highlands Memory Support at The Moorings is a beautiful and sensitive environment specifically designed to meet the needs of these residents. We provide dignified person-centered activities using a technology system called It's Never 2 Late. This system can adapt activities to meet each resident's abilities and increase cognitive stimulation while

enhancing family involvement. Residents are able to improve their socialization and quality of life by taking advantage of our amenities available such as our chapel, wellness clinic, therapy services, walking paths, meditation garden and so much more.

In this setting, we provide each resident with the greatest opportunity to experience joy, friendship and the security of belonging to a community. Each individual benefits from this unique approach. We believe this innovative approach creates a relationship of trust, understanding and commitment.
